## Work--

### 1. CleverTap, Bombay

15 July 2015- Present

Front-end engineer

[CleverTap](#) is mobile marketing platform which provides user engagement and analytics in real-time. It has thousands of global customers including Sony, Vodafone, Go-Jek, Star India and funded by Sequoia Capital and Accel Partners.

I was the 2nd hire in the Front-end department and then gradually took the charge of Front-end side of the product. I'm now leading the Front-end and mentoring one UI engineer. My responsibility includes -

- Discussing new feature designs with the design team and providing feedback
- Planning the execution of the feature
- Refactoring codebase, improving UI, solving UI and JavaScript bugs
- Introducing new HTML5 and CSS features in the product

## Extras--

### 1. [Micromodal.js](#) - A JavaScript library for accessible modals

This was first collaborative project to hone my ally skills.

### 2. [MatchMyEmo](#) - A real-time facial emotion recognizer

A weekend project which takes your photo through webcam and instantly share your facial emotions' report card to you.

## Contributions--

### 1. [Building Mega Menus with Flexbox](#), [SitePoint](#)

### 2. [Window.devicePixelRatio](#), [MDN Web Docs](#)

## Education--

Bachelor Of Engineering

2011 -2015

Information Technology
